

# FWC's Python Pickup

**Help conserve Florida's native species and win prizes!**

Pythons can be removed year-round in the state of Florida. The FWC's Python Pickup is designed to encourage people to remove pythons from the Everglades ecosystem and report them to the FWC. Anyone can get involved!

**You can participate by removing pythons from any property in Florida, but you must have authorization from the landowner or land managing agency.**

- Private lands – you can remove pythons year-round with landowner permission
- FWC managed lands in south Florida – for a list of areas where python removal does not require a permit or license, visit [MyFWC.com/Python](http://MyFWC.com/Python) and click on “FWC Python Pickup Program”
- Other public lands – you must have authorization from the land managing agency

**Take at least 2 photos of each python you remove to create your program entry.**

- Show the entire python that has been humanely euthanized and can be identified as a Burmese python
- Show the python and a GPS unit that clearly shows the location and the date of capture (this may require 2 photos)

**Email your photos to [Pythons@MyFWC.com](mailto:Pythons@MyFWC.com) to submit your program entry.**

- Write “Python Pickup” in the subject line
- Include your name, phone number, mailing address and GPS location of capture in the body of your email; include t-shirt size with your first submission
- Attach your photographs

Python Removal Permit holders wanting to submit live pythons must follow the provisions for reporting and transporting them. Mention “Python Pickup” in the report. For more information, visit [MyFWC.com/Python](http://MyFWC.com/Python) and click on “Python Removal Permit.”

## **Win prizes!**

- For the first python submitted, participants will receive a t-shirt
- Each submission will gain one entry into the monthly and grand prize drawings
- For a list of prizes visit [MyFWC.com/Python](http://MyFWC.com/Python) and click on “FWC's Python Pickup”

For more information, visit [MyFWC.com/Python](http://MyFWC.com/Python) and click on “FWC Python Pickup Program.”  
Email questions to [Pythons@MyFWC.com](mailto:Pythons@MyFWC.com).
